“The use of CBCT in implant planning and Periodontic practice”

DMDI’s first Professional Development session on 26th May held by **Dr Andrei Locke** who is a specialist in Periodontics and Dental Implants was a great success. Those who attended acknowledged that the information presented by both Dr Locke and DMDI was of great benefit, as well as a wonderful opportunity to network with other Dental professionals. This session attracted 1.5 CPD points.

DMDI would like to thank Dr Andrei Locke for his professional overview, and those who attended on the night.

Future professional development events are planned for later in the year. Notification will be in the Newsletter.

An excerpt from Dr Locke’s presentation included why he chooses to use CBCT and the benefits gained from it -

“Clinical Benefits CBCT

- quick & simple for patients
- relatively low radiation dose for info gain
- minimal scatter, image quality
- reformat for accuracy & multiple uses
- Accurate diagnoses & treatment planning – more predictable management.”
